

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date Contact Made: December 6, 2000

Site Contact(s): Carolyn Hicks, Building 776/777 Environmental Compliance
Phone: (303) 966-5773

Regulatory Contacts: Edd Kray, 2:00 p.m., (303) 966-2115
James Hindman, 3:30 p.m., (303) 692-3345

Agency: CDPHE

Purpose of Contact: Notify CDPHE that we identified a small mixed residue vacuum accumulator tank that has not been previously identified in the mixed residue consent order.

Discussion

On a walkdown of Set 11 in Building 777 Room 134 east, one additional small mixed residue vacuum accumulator tank was identified beneath Glovebox 747 in addition to the five known vacuum accumulators in this room. This tank, which will be labeled as V-747A, has approximate dimensions of six inches diameter by one foot high. This tank and the associated vacuum pump were drained in January 2000 under IWCP Work Package T0100104, which also included draining the other vacuum accumulator tanks and pumps in Building 777. The vacuum accumulators all contained F-listed oil/solvent mixtures.

Mr. Hindman and Mr. Kray agreed with our proposed path forward, which is to include closure information for this tank system with the Set 11 closure information currently being prepared as a DOP modification. We intend to conduct closure by removal and manage the tank system as mixed waste. The tank does not need to be added to the mixed residue consent order at this time since it is already physically empty.
